

cap · ture

MIRRORIMAGE cap · ture

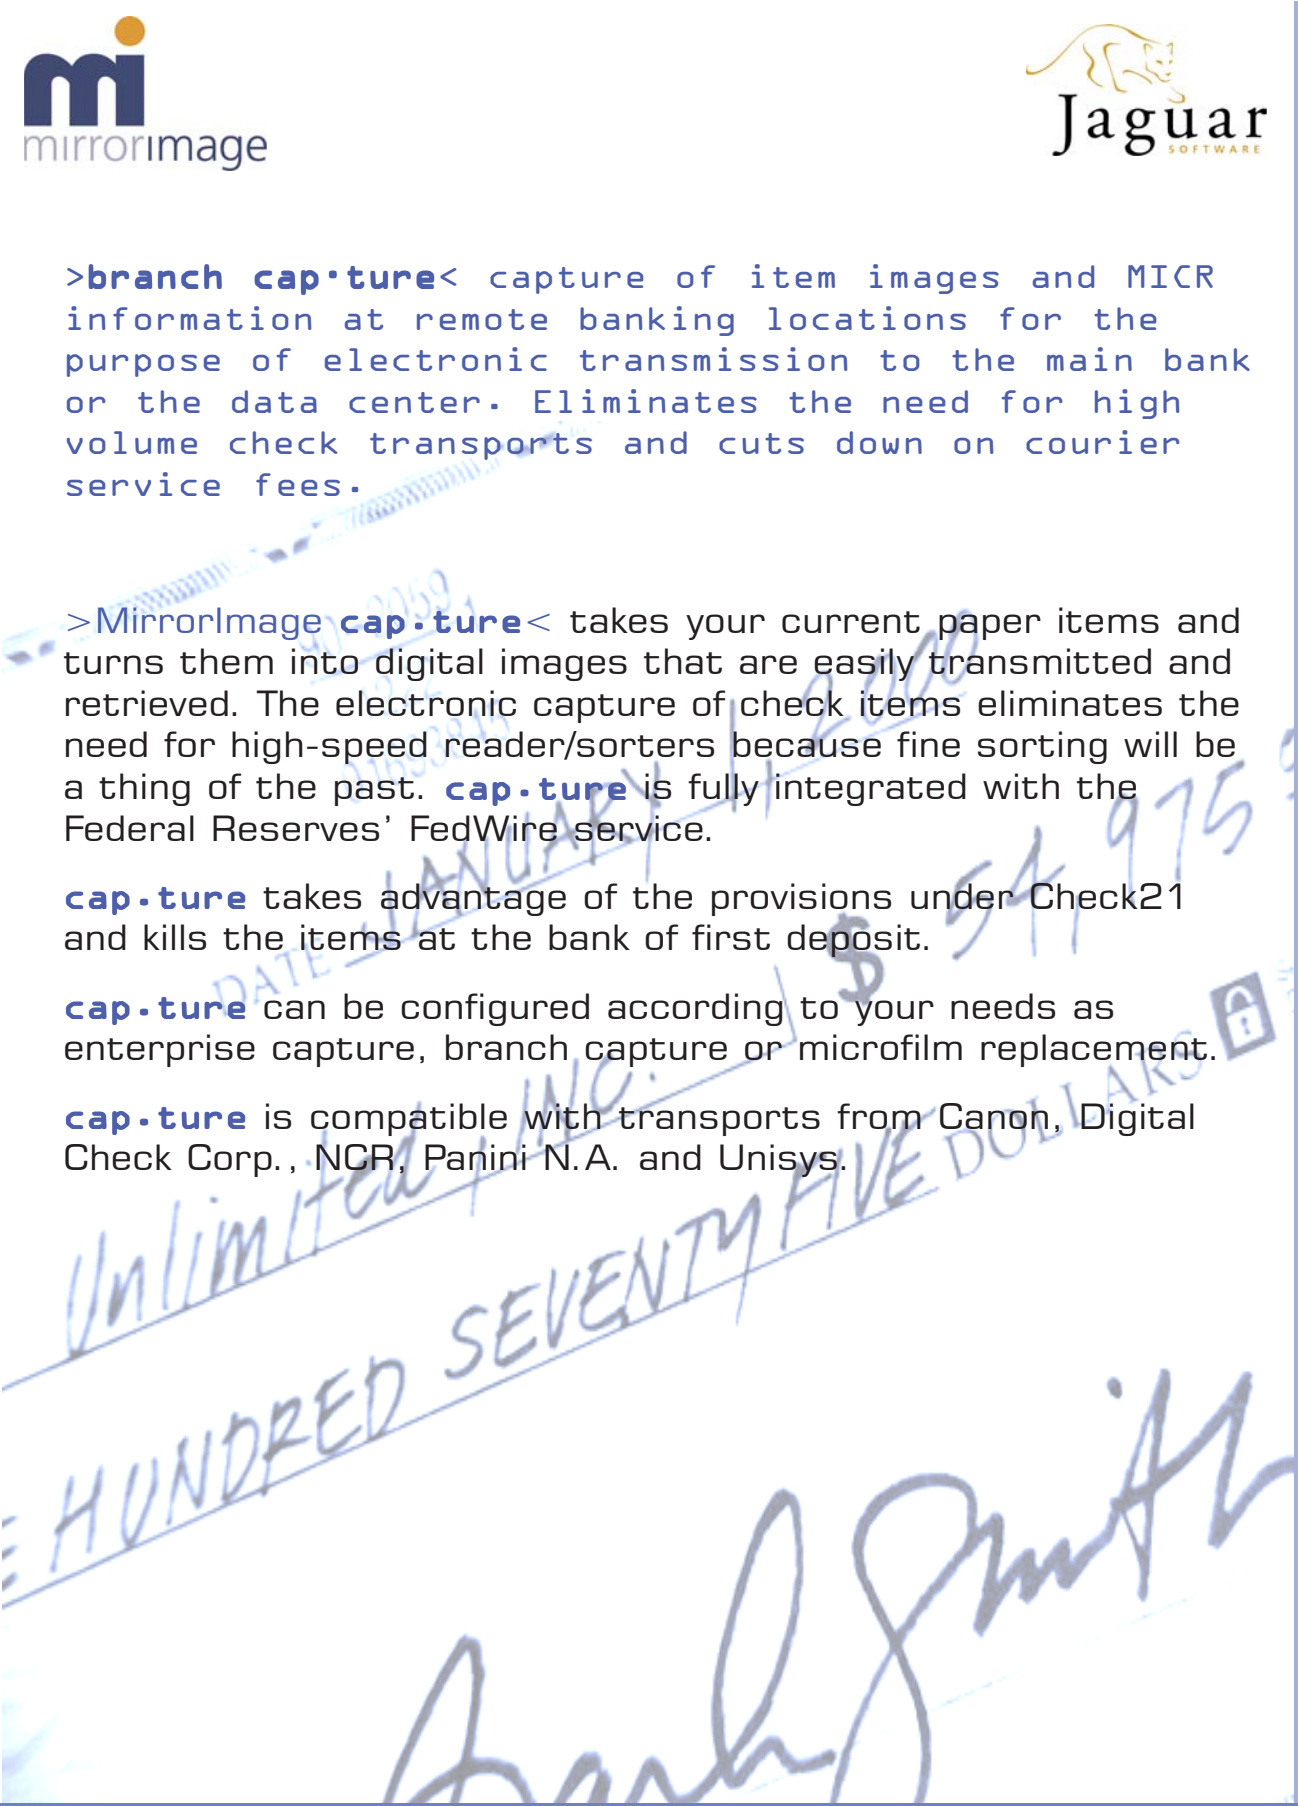

>branch cap · ture< capture of item images and MICR information at remote banking locations for the purpose of electronic transmission to the main bank or the data center. Eliminates the need for high volume check transports and cuts down on courier service fees.

>MirrorImage cap · ture< takes your current paper items and turns them into digital images that are easily transmitted and retrieved. The electronic capture of check items eliminates the need for high-speed reader/sorters because fine sorting will be a thing of the past. cap · ture is fully integrated with the Federal Reserves' FedWire service.

cap · ture takes advantage of the provisions under Check21 and kills the items at the bank of first deposit.

cap · ture can be configured according to your needs as enterprise capture, branch capture or microfilm replacement.

cap · ture is compatible with transports from Canon, Digital Check Corp., NCR, Panini N.A. and Unisys.
